To Whom It May Concern:

RE: Recommendation of River City Flooring

I am offering this letter of recommendation for River City Flooring.

At Wyoming Public Schools, River City Flooring worked directly with district personnel and the schedules for our school district. They successfully removed and installed 35,000 yards in thirteen buildings. River City Flooring has the ability to work with minimal distraction to the educational process.

They were very successful at completing every room in each building, including breakdown and setting up the classrooms for the next day. This was done in the evenings during the school year beginning December 2007 and completion in the spring of 2008 with minimal interruptions to the staff and students in the building.

They were flexible and reliable in all areas of the project. Communication was open during the entire project and the project was completed ahead of schedule.

River City Flooring truly takes the owner's interest to heart in all decisions that are made.

I know that their responsibility and desire to provide the best for the owner, children and community will make them successful with your district. I recommend them without reservation. To further discuss their abilities, please call me at (616) 530-7570.

Sincerely,

Don Hebel  
Director of Operations  
Wyoming Public Schools
